100% MADE IN ITALY

3XL37P/TR.RTR

Gynaecological height adjustable couch with
Trendelenburg and Reverse Trendelenburg

3XL37P/TR.RTR

BASIC CONFIGURATION

The structure has excellent manoeuvrability determined by the use of 4 electric actuators controlled by a push-button panel, allowing height adjustment and Trendelenburg / Reverse Trendelenburg position thanks to which patients can reach the facilitated exit position (as shown in first picture).

The very sturdy and resistant central column allows you to adjust the structure in height, with a range of 50 to 100 cm; its strength is equal to 4000N.

The backrest is adjustable with an electric actuator and it is able to reach + 75 ° in positive and -10 ° in negative; the leg cushion also operated by an electric actuator reaches -90 ° in negative and + 5 ° in positive.

The upper surface is made of high density foam covered in coated fabric (skai, imitation leather) fireproof class 1 IM. The density of the rubber used guarantees comfort and proper support of the patient during the examination.

The very compact "X" shaped base of the structure allows the operator to approach the patient easily, making it very practical and comfortable to use.

The chair is equipped with a paper roll-holder and has 4 adjustable feet that guarantee greater stability. Foldable side handles and retractable wheels kit can be added to the configuration. If preferred, the push button panel can be substituted with a pedal control.

The electrical parts comply with the regulations in force in the hospital field.

TECHNICAL FEATURES

The armchair is made of tubular furniture with remarkable performance characteristics that guarantee stability and sturdiness. The construction materials are square, rectangular and round furniture tubes Uni 7947/81 and 8913, DIN 2394, threaded bushes in AVP, flat in FE.

The structure follows a process of phospho-degreasing, rinsing and application of the powder paint polymerised at 200°C, its minimum thickness is 70/80 microns. The finish is glossy.

DIMENSIONS:

Length: 182cm (for the 3 sections)

Width: 68cm (seat)

Height: 57-98cm (adjustable)
