

CALDARA

100% MADE IN ITALY

TF3XL3

Four sections variable height treatment couch with
tr/rtr movement

TF3XL3

BASIC CONFIGURATION

The couch is made of metal with remarkable performance characteristics that guarantee stability and sturdiness. It comes with this innovative line which makes it very comfortable and easy to use for the operator. The cushions can be reclined by means of a gas spring that can be operated thanks to the ergonomic levers located under the upper frame. The inclination of the headboard is equal to +70° in positive and -35° in negative. The inclination of the leg cushion is +80° positive. The two electric columns allow height adjustment and in addition to the simultaneous and parallel movement they are able to move distinctly allowing the structure to reach the TR/RTR position very quickly. In addition to the pedal, the devices that allow adjustment can be a push-button panel or two very comfortable perimeter bars (perimeter control) on the right and left side of the couch; their length is equal to 1 m.

The high-density rubber padded top is covered in class 1 IM fireproof coated fabric (skai, imitation leather), washable with common commercially available detergents. The structure is **equipped with a roll holder, nose slit in head section and armrests**. There are 4 adjustable feet.

The electrical parts comply with the regulations in force in the hospital field.

TECHNICAL FEATURES

The construction materials are square, rectangular and round furniture tubes Uni 7947/81 and 8913, DIN 2394, threaded bushes in AVP, flat in FE. The structure follows a process of phospho-degreasing, rinsing and application of the polymerized powder paint at 200 ° C, its minimum thickness is 70/80 microns. The finish is glossy.

Electric vertical columns 2000N each
1. 600N gas spring.

NB: it is possible to request the bed with a different width (68cm / 80cm / 100cm / 120cm).
